

RAW DISCORD BOT

Comprehensive Staff Operating Handbook & Systems Architecture Manual: Automated Moderation, Disciplinary Appeals, Engagement Engines & Command Guide.

Bot Identity: RAW (formerly Hinata)

Command Prefixes: r & h + Slash (/)

Storage: MongoDB Atlas (100% Data Preserved)

1. Human-Like AI Moderation System & Discipline Flowchart

Unlike legacy bots that blindly mute or ban users for harmless slips, **RAW** moderates with human-like progressive escalation, fairness, and empathy. The engine operates on an automated 5-stage disciplinary ladder coupled with a natural forgiveness decay window.

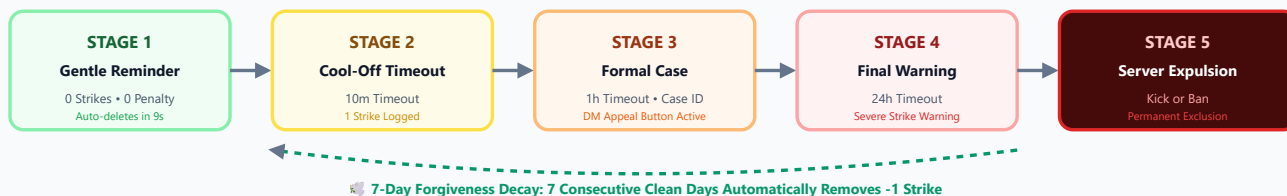

FIGURE 1.1: AUTOMATED 5-STAGE PROGRESSIVE ESCALATION & FORGIVENESS DECAY MATRIX

Engine Dynamic Chat Heat Monitor

Continuously measures message velocity and flame-war disputes. If chat velocity spikes past **8 messages / 10s** across multiple members, RAW temporarily applies a **5s slowmode** with a calming notification. As soon as the room stabilizes, slowmode is automatically lifted.

Security Anti-Bypass Text De-Obfuscator

Intercepts sophisticated evasion tricks: strips zero-width hidden unicode, normalizes Cyrillic lookalikes (`a` → `а`), decodes leetspeak, collapses spaced evasion (`s p a m` → `spam`), and runs OCR on uploaded images to catch hidden scam invites.

2. Staff Disciplinary Appeals Workflow (One-Click Pardon)

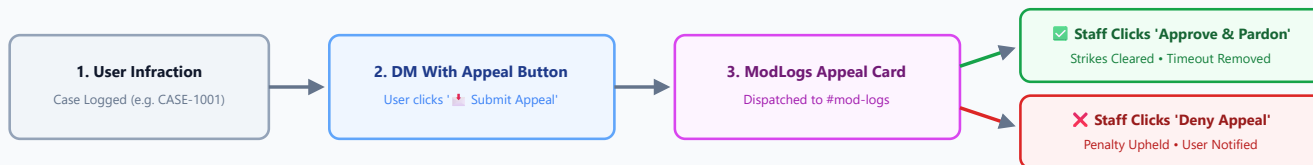

FIGURE 1.2: ONE-CLICK INTERACTIVE DISCIPLINARY APPEAL RESOLUTION PIPELINE

12 34 3. Interactive Engagement & Mathematical Engines

Channel
Game

Next-Gen Counting Engine (

/counting)

Designed to drive high server engagement with built-in mathematical processing and anti-griefing checks:

- **Math Equation Solver:** Users can post numbers (42) or valid math (40 + 2 , 6 * 7 , 100 - 58).
- **Strict Anti-Double-Count:** A user cannot count twice consecutively.
- **High-Score & Streak Tracking:** Records current streak vs. all-time server record.
- **Fail Safe & Auto-Reset:** Breaking sequence triggers a friendly alert, pins the achieved streak, and resets to 0.
- **Management:** /counting setup #channel | /counting status | /counting leaderboard

Auditing

4-Way Real-Time Invite Tracker (

/invites)

Comprehensive join audit tracking retention, fake alts, and bonus points:

- **Net Total Formula:** (Regular + Bonus) - (Leaves + Fakes) .
- **Alt Detection:** Accounts < 3 days old or bots are flagged as ⚠ Fake.
- **Join Auditing:** /invites audit @user reveals inviter code & timestamp.
- **Leaderboard:** Real-time ranked leaderboards with podium badges.
- **Staff Controls:** /invites-manage add/remove/reset .

🏆 4. Community Honor & Reputation System (/honor)

Encourages positive community behavior by letting members award commendation points. Users unlock tiered recognition roles automatically as their score grows:

Honor Level	Required Points	Automatic Server Role	Privileges & Community Standing
Level 1	0 – 9 Points	Recruit Member	Base standing, standard permissions.
Level 2	10 – 24 Points	🏆 Respected Member	Access to VIP chat & voting polls.
Level 3	25 – 49 Points	🌟 Honorable Member	Priority queue access, custom voice room perks.
Level 4	50 – 99 Points	💎 Distinguished Pillar	Community advisory access & event privileges.
Level 5	100+ Points	👑 Radiant Paragon	Highest server honor badge & special recognition.

🛡️ **Anti-Exploit Safeguards:**

Each user has **3 commendation tokens per 24 hours**

. A 24-hour cooldown applies between the same two users to eliminate token trading, and self-honoring is strictly blocked.

📈 5. Leveling & XP Progression Engine

Activity

Voice & Text XP

AmariBot-calibrated algorithm awarding 15–25 XP per minute of chat activity with a 60-second anti-spam cooldown, plus passive XP in active voice channels.

Visuals

Graphic Rank Cards

r rank displays a rendered graphic rank card displaying level, total XP, current server rank, avatar, and animated progress bar.

Automation

Auto-Role Rewards

Automatically assigns custom reward roles at Level 5, 10, 20, 30, and 50. Staff can deploy presets with **/leveling setup** in 1-click.

6. Server Infrastructure, Templates & Support

Setup 27+ Blueprints & ChatGPT Builder

Deploy 27+ curated templates (Gaming, Anime, Tech, Esports, Study, Clan) or use **ChatGPT Custom Builder**:

Paste any JSON/Markdown server blueprint into `/template custom`, and RAW creates all channels, categories, and role permissions instantly.

Verification 10+ Rules Presets & Verification

High-grade rulesets with interactive buttons (`/rules send`):

Deploys styled rules with an interactive "  **Accept Rules & Verify**" button that automatically grants the Member role upon clicking.

Tickets Multi-Department Support Tickets

Button-based ticket creation (`/ticket panel`):

Supports General Support, Player Reports, and Staff Applications. Generates private locked channels with HTML transcript backups upon closing.

Audio Music Studio & Smart AI Radio

24/7 high-fidelity streaming from YouTube, Spotify, and SoundCloud:

`r radio` learns song vibes and queues non-stop matching tracks. Includes Spotify-style playlist saving and interactive music panels.

7. Master Staff Command Reference Matrix

Module	Slash Command (/)	Prefix (r or h)	Staff Action & Capability
Disciplinary Cases	/modcase view case_id:ID	r case <id>	View case file, infractions, moderator notes, and appeal log.
Member History	/modcase history user:@user	r cases @user	Inspect complete incident history and active strike count.
Check Strikes	/modcase strikes user:@user	r strikes @user	Check active strikes and time left on 7-day decay timer.
Pardon Case	/modcase pardon case_id:ID	r pardon <id>	Discretionary staff pardon: clears strike and lifts active timeout.
HumanMod Setup	/automod human-mod	—	Tune sensitivity, decay days, slowmode trigger thresholds.
Counting Control	/counting status	—	Audit counting streak, record high score, top contributors.
Invite Audits	/invites audit user:@user	—	Inspect who invited a member, code used, and fake alt status.
Level & Rank	/rank [user]	r rank [@user]	View user AmariBot-style Level and XP card.
Honor Commend	/honor give user:@user	r honor @user	Commend member for teamwork, mentorship, or leadership.
Snipe Deleted	/snipe [channel]	r snipe	Reveal recently deleted message, sender, and attachments.
Ghost-Ping Log	— *(Automatic)*	r ghostping	View who ghost-pinged whom; logged to #mod-logs.
AFK Nickname	/afk [reason]	r afk [reason]	Appends [AFK] to nickname and informs users who ping them.
Music Studio	/play /radio	r play r radio	Stream 24/7 audio, smart autoplay, or launch music panel.

 **Cloud Data & High Availability:** All records, active strikes, honor points, counting streaks, and server configurations are synchronized in real time with our MongoDB Atlas cloud cluster. Container restarts on Render will never wipe user data.
